WHITE PAPER: Netscout Systems Inc.

### [\*\*Adopt a More Service-Oriented Management Strategy\*\*](#)

The survey results in this report demonstrate dramatic changes happening in IT service management delivery and highlight best practices to assure performance of business processes, deliver exceptional end-user experiences, optimize existing infrastructure, and speed the deployment of new technologies and services. [Learn More.](#)

---

### [\*\*Cisco, Insieme tout 'penalty-free' fabric architecture\*\*](#)

Cisco this week significantly extended its data center networking portfolio with a new fabric architecture, an enhancement to another and, as expected, an extension to its Nexus core switching line. [Read More](#)

### [\*\*Cisco Live: Breaking down Cisco's new data center strategy\*\*](#)

Day 1 of Cisco Live was all about the branch and campus with the release of the Cisco ONE Enterprise Network Architecture, coupled with a bevy of new products, including a new branch router, aggregation services appliance, and access switches, including the Catalyst 6800 – a replacement for the long-lived Cat 6500. The 6800 replacement is significant as I've long felt that the 6500 is the "Joe..." [Read More](#)

### [\*\*Cisco Unveils a New Security Architecture at CiscoLive\*\*](#)

As someone with more than 25 years in the IT industry, I have to give strong kudos to Cisco for putting on a great show this week. CiscoLive is being held in Orlando which is totally appropriate as Cisco has made the event the "magic kingdom" of all things IT. Surrounded by abundant symbols of the "Internet of Everything," Cisco really presents itself as the one vendor CIOs should look to... [Read More](#)

### [\*\*3 Ways to Jump-Start IT Innovation\*\*](#)

To spark valuable new business ideas, these three CIOs are trying out creative techniques. [Read More](#)

### [\*\*11 highlights from Microsoft's BUILD conference\*\*](#)

Microsoft kicked off its BUILD developers conference Wednesday with a two hour keynote. Here are some of the takeaways. [Read More](#)

### **INSIDER** [\*\*Walgreens Opens Up to External Mobile Apps\*\*](#)

The drugstore chain builds an open API layer that lets mobile app developers connect to its corporate systems. [Read More](#)

### [\*\*Ballmer: Happiness is a Windows 8 device with a touchscreen\*\*](#)

Windows 8 on a touchscreen device makes users happier than Microsoft's currently most popular operating system, Windows 7, CEO Steve Ballmer says. [Read More](#)

### [\*\*The Dangers of Disconnected Data\*\*](#)

CIOs in the food and pharma industries confront unique challenges in untangling complex supply chains to ensure product safety and availability. [Read More](#)

### [\*\*Stuart Biggs, first Cisco CCIE, dies at age 53\*\*](#)

Stuart Biggs, who in 1993 led a team that created the Cisco Certified Internetwork Expert program and was the first to be awarded a CCIE number, has died at age 53. [Read More](#)

### [\*\*Microsoft bulks up Azure to make it easier to build, expand cloud services\*\*](#)

Microsoft is making it simpler for business applications in its Azure cloud to automatically turn services up and down as demand requires and for apps to incorporate features of Office 365, company executives told the Build 2013 developer conference. [Read More](#)

## **[BlackBerry sells 6.8 million smartphones, makes a loss in its first fiscal quarter](#)**

BlackBerry shipped 6.8 million smartphones and recorded a US\$84 million loss during the three months to June 1, as it struggles to turn around its fortunes. [Read More](#)

## **[Fast and furious 7: Apps primed for the gigabit Internet](#)**

When gigabit Internet brings jaw-dropping speed, these apps will be ready to make good use of it [Read More](#)

---

WEBCAST: IBM

## **[Content Analytics Explained](#)**

Content Analytics Explained - Listen to Bob Foyle, Sr. Product Manager, IBM talk about Content Analytics and the Analytics Imperative. [Learn More.](#)

---

## **[Trusteer Apex prevents exploits that may compromise endpoints and put enterprises at risk](#)**

Most forms of malware and advanced persistent threats enter the enterprise through vulnerable endpoints. A new solution from Trusteer uses innovative techniques to prevent exploits and malware from compromising the endpoints and extracting information. [Read More](#)

## **[10 factors that hobbled Windows 8 and what Windows 8.1 might do to fix them](#)**

Microsoft is making a big effort this week to resuscitate Windows 8 with a preview of the first major upgrade to the operating system since it launched last October, but it has a lot to overcome. [Read More](#)

## **[How will cloud, virtualization and SDN complicate future firewall security?](#)**

The firewall in decades past was mainly the port-based guardian of the Internet. Now vendors are vying to build so-called "next-generation firewalls" that are "application-aware" because they can monitor and control access based on application use. [Read More](#)

## **[Cisco fixes serious vulnerabilities in email, Web and content security appliances](#)**

Cisco Systems released security patches for its email, Web and content security appliances in order to address vulnerabilities that could allow attackers to execute commands on the underlying OS or disrupt critical processes. [Read More](#)

## **[Windows 8.1 hidden features](#)**

Windows 8.1 hidden features From PC World: There's a lot to learn about Windows 8.1. We'll show you some of the coolest hidden features you need to know about. From: networkworld Views: 4 0 ratings Time: 01:53 More in Science & Technology [Read More](#)

## **[Verizon notches 500th LTE market, declares initial rollout done](#)**

Verizon Wireless has completed the initial rollout of its 4G LTE network, covering 95 percent of the U.S. population, and is now looking to reuse other spectrum for LTE and deploy small cells using the technology. [Read More](#)

## **[IT Service Management Tools Help Airline Fix Glitches Faster](#)**

Mapping technologies to key business processes helps IT group prioritize fixes when problems occur. [Read More](#)

## **[MIT researchers can see through walls using 'Wi-Vi'](#)**

If Google Glass isn't enough to get you worried about technology, how about a device that can see through walls using Wi-Fi? [Read More](#)

## **[8 hot mobile startups to watch](#)**

Just how big of a deal is mobile? Three years ago there were an estimated 400 venture capital deals for mobile companies, with about \$3 billion invested in the industry. Last year, according to Rutberg & Co., which tracks mobile investments, VCs poured more than \$6.85 billion into mobile startups across about a thousand deals. Mobile companies captured 40% of venture capital funding last year, Rutberg found. [Read More](#)

## **[Microsoft promises IE11 on Windows 7](#)**

Microsoft today confirmed that Internet Explorer 11 (IE11) will be ported to Windows 7, but declined to name a release date. [Read More](#)

## [Haswell vs. Sandy Bridge: Was the upgrade worth it?](#)

It's been my policy to upgrade my PC on Intel's "tock" schedule, when they have a new architecture. There's really no reason to upgrade on the "ticks," since that's just a die shrink. Plus, my Sandy Bridge-based PC was starting to act a little funny, giving strange, random errors, and I hated the case. So I didn't need many excuses for a shopping spree at Fry's. [Read More](#)

## [Big Data Analytics Moves to the Cloud](#)

What if you could store your data in the cloud and run complex queries and analytics on it where it resides, without moving it? That's the question high-performance cloud infrastructure and big data analytics specialist Joyent looks to answer with its new Joyent Manta Storage Service. [Read More](#)

## [Is Google getting ready to take the handcuffs off of Motorola?](#)

It's finally happening – Google-backed Motorola is getting ready to plunge back into the battle for top-tier Android OEM status. At least, that's what this week's batch of news stories and rumors suggests. [Read More](#)

## **SLIDESHOWS**

### [Ultimate ultrabook shootout](#)

Testing of eight Windows 8 ultrabooks reveals that users looking for a sleek form factor will have to accept tradeoffs.

## **JOIN THE NETWORK WORLD COMMUNITIES**

As network pros you understand that the value of connections increase as the number of connections increase, the so called network effect, and no where is this more evident than in professional relationships. Join Network World's LinkedIn and Facebook communities to share ideas, post questions, see what your peers are working on and scout out job applicants (or maybe find your next opportunity).

### [\*\*Best practices for firewall management\*\*](#)

Year after year, the Verizon Data Breach Investigations Report shows that device misconfigurations are a leading source of vulnerabilities that open the door to data breaches. With that in mind, here are some best practices for firewall management. [Read More](#)

### [\*\*Delaware whacks \\$1B data center/power supply project\*\*](#)

University of Delaware The University of Delaware data center project The University of Delaware this week killed off a plan to develop a 900,000 sq. ft. data center project that included a 279-megawatt cogeneration power plant. Citing the size of the project, the potential effects of subsequent greenhouse gases, public opposition and other issues the university pulled the plug on the \$1 billion project that was being developed for its 272 acre Science, Technology & Advanced Research (STAR) Campus by The Data Centers, LLC (TDC).To read this article in full or to leave a comment, please click here [Read More](#)

### **INSIDER** [\*\*Must-have tools for setting up a Wi-Fi net\*\*](#)

In order to ensure proper Wi-Fi coverage and performance, RF site surveys should be performed before and after WLAN installations and modifications. Though you can walk around and do simple signal checks and throughput tests using free software on your laptop, using Wi-Fi surveying software provides much better testing and reporting.To read this article in full or to leave a comment, please click here(Insider Story) [Read More](#)

### [\*\*How WebRTC Is Making Enterprise Inroads\*\*](#)

Jeff Singman operates two brick-and-mortar specialty toy stores in New Jersey and has wanted to provide an ecommerce website as well. Singman says his two Toy Genius stores, which he co-owns with his wife, offer shoppers a high level of product knowledge and customer service to stand out from other toy sellers. Employees wear lab coats and demonstrate products for customers. Gift wrapping is free of charge.But Singman found it difficult to replicate that brand of white-glove service online. "We were looking for a way to bring that ... shopping experience to the Web. I actually had the vision since 2011, but I couldn't affect that vision."To read this article in full or to leave a comment, please click here [Read More](#)

### [\*\*11 ways LXLE Linux will make you forget all about XP\*\*](#)

A lightweight powerhouseWindows XP's long run may have finally come to an end, but that doesn't mean your XP-era hardware has to go too. No indeed: There are numerous options available in the Linux world, and one shining example is LXLE.To read this article in full or to leave a comment, please click here [Read More](#)

### [\*\*6 of the very coolest new Microsoft lab projects\*\*](#)

Here we take a look back at Microsoft annual science fair, TechFest 2013, where it showed off some of the innovations the company was working on. [Read More](#)

### [\*\*PingPlotter and AT&T's flaky DNS servers\*\*](#)

One of my favorite tools for tracking down network problems is a tool called PingPlotter published by Nessoft. I've written about PingPlotter several times (the last time in 2011, although it did also have a starring role in sorting out my problems with AT&T in 2012). In fact, this utility has helped me so many times it's ridiculous. Here's my summary of PingPlotter from my last roundup of my favorite tools: Nessoft's PingPlotter ... tests connectivity to one or more target hosts on your local network or on the Internet and plots the results. What PingPlotter is actually doing is repeatedly running a traceroute to identify all of the intermediate routers between your machine and the targets and testing each for how long it takes to respond. The tool also measures "packet jitter" (the variation in how quickly packets are handled), VoIP Mean Opinion Score or MOS (an estimation of perceived voice quality), and standard deviation of packet transit time. Pingplotter comes in freeware, Standard (\$24.95) and Pro (\$199.95) versions. Pingplotter ... gets a rating of 5 out of 5. The company has rebranded the store as Samsung Galaxy Apps [Read More](#)

### **INSIDER** [\*\*Universal Apps: Microsoft's bid to bring mobile developers back to Windows\*\*](#)

By most accounts, Microsoft CEO Satya Nadella has inherited a mess in the form of Microsoft's mobile strategy. Moreover, 14 years since then-CEO Steve Ballmer's infamous "developers, developers, developers" chant, Microsoft has confused, frustrated, and in some cases alienated developers with its multiple incompatible development platforms, in particular around mobile devices. To read this article in full or to leave a comment, please click here (Insider Story) [Read More](#)

### [\*\*Gmail users on iOS at risk of data interception\*\*](#)

Apple users accessing Gmail on mobile devices could be at risk of having their data intercepted, a mobile security company said Thursday. The reason is Google has not yet implemented a security technology that would prevent attackers from viewing and modifying encrypted communications exchanged with the Web giant, wrote Avi Bashan, chief information security officer for Lagoon Mobile Security, based in Israel and the U.S. Websites use digital certificates to encrypt data traffic using the SSL/TLS (Secure Sockets Layer/Transport Layer Security) protocols. But in some instances, those certificates can be spoofed by attackers, allowing them to observe and decrypt the traffic. ### **[Y2K bug resurfaces and sends draft notices to 14,000 men born in the 1800s](#)**

That Y2K bug that made life miserable for so many IT professionals in the late 1990s has proven to be problematic just recently for the next of kin of some 14,000 men who were born in the 1800's.From an AP report: The Selective Service System mistakenly sent notices to more than 14,000 Pennsylvania men born between 1893 and 1897, ordering them to register for the nation's military draft and warning that failure to do so is "punishable by a fine and imprisonment."The glitch originated with the Pennsylvania Department of Motor Vehicles during an automated data transfer of nearly 400,000 records to the Selective Service. The records of males born between 1993 and 1997 were mixed with those of men born a century earlier, Selective Service spokesman Pat Schuback told The Associated Press on Thursday. The federal agency didn't know it because the state uses a two-digit code to indicate year of birth.To read this article in full or to leave a comment, please click here [Read More](#)

### **[Bell Labs claims new speed record over regular old copper wiring](#)**

Most of the higher-speed Internet connections used by businesses these days require fiber-optic cabling, but Alcatel-Lucent's Bell Labs division claimed this week to have reached 10Gbps using nothing but new transmission technology and ordinary copper wiring. The technology, called XG-FAST, is an outgrowth of a standard undergoing final review at the International Telecommunications Union, called G.fast. The G.fast specification calls for the use of a wide spectrum range of 106MHz – far larger than that used by existing DSL technology. Effectively, G.fast can send or receive data much faster than conventional DSL, though it can only do so over comparatively short distances, around 100 meters.To read this article in full or to leave a comment, please click here [Read More](#)
